Duration	3 mins 35 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

- a. In the right sublist ✓
- b. In the middle of the list
- c. At the beginning of the list
- d. In the left sublist

Question **2**

Incorrect

Mark 0.00 out of 1.00

What happens in a binary search if the list has an even number of elements?

- a. The lower middle element is chosen as the middle element ✗
- b. The search stops
- c. The middle element is chosen randomly
- d. The higher middle element is chosen as the middle element

Question **3**

Correct

Mark 1.00 out of 1.00

What is the first step in binary search?

- a. Divide the list into two equal parts
- b. Compare the target element with the first element in the list
- c. Compare the target element with the middle element in the list ✓
- d. Sort the list

Question **4**

Correct

Mark 1.00 out of 1.00

In linear search, how is the element searched?

a. By sorting the list first
b. By comparing each element in the list sequentially ✓
c. By dividing the list into halves
d. By using a hash function

Question **5**

Correct

Mark 1.00 out of 1.00

In binary search, what happens if the middle element does not match the target element?

a. The list is sorted
b. The search continues from the beginning
c. The search stops
d. The search continues in the left or right sublist ✓

Question **6**

Correct

Mark 1.00 out of 1.00

Which of the following is a conventional searching technique?

a. Linear search ✓
b. Dynamic search
c. Hashing
d. Binary search

Question **7**

Correct

Mark 1.00 out of 1.00

_____sort is the simplest sorting algorithm that works by repeatedly swapping the adjacent elements in case they are unordered in n-1 passes.

a. Complexity

b. Bubble ✓

c. Selection

d. Insertion

Question **8**

Correct

Mark 1.00 out of 1.00

Which of the following is not the required condition for a binary search algorithm?

a. Number values should only be present

Number values should only be present

b. There must be a mechanism to delete and/or insert elements in the list ✓

c. The list must be sorted

d. There should be direct access to the middle element in any sublist

Question **9**

Correct

Mark 1.00 out of 1.00

What is the advantage of binary search over linear search?

a. Binary search does not require dividing the list

b. Binary search can find multiple instances of the target element

c. Binary search has a lower time complexity on large, sorted lists ✓

d. Binary search works on unsorted lists

Question **10**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

- a. Determining whether an element is present in a list ✓
- b. Sorting elements in a list
- c. Deleting elements from a list
- d. Inserting elements into a list

Question **11**

Correct

Mark 1.00 out of 1.00

What happens when the element is found in linear search?

- a. The search stops immediately ✓
- b. The search starts over from the beginning
- c. The search backtracks to find duplicate elements
- d. The search continues until the end of the list

Question **12**

Correct

Mark 1.00 out of 1.00

_____ search takes a sorted/ordered list and divides it in the middle.

- a. Hash
- b. Linear
- c. Binary ✓
- d. Both (1) & (3)

Question **13**

Correct

Mark 1.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 100; What are the mid values(corresponding array elements) generated in the first and second iterations?

- a. 90 and 99 ✓
- b. 89 and 94
- c. 90 and 100
- d. 94 and 99

Question **14**

Correct

Mark 1.00 out of 1.00

In which situation is linear search more efficient than binary search?

- a. When the list is small and sorted
- b. When the list is small and unsorted ✓
- c. When the list is large and sorted
- d. When the list is large and unsorted

Question **15**

Correct

Mark 1.00 out of 1.00

During a binary search, what happens if the target element matches the middle element?

- a. The search continues in the left sublist
- b. The search continues in the right sublist
- c. The list is sorted
- d. The search ends successfully ✓
